About me

I have been writing code professionally for two years, and before starting my first job as a programmer, I spent one year at self-study. I can create fast and responsive pages with modern technologies. I have been learning new features all the time to provide the best solutions.

Education

POST-SECONDARY COLLEGE OF SPORT MEDICINE

Vocational education | 2017 - 2019

specialisation: Massage therapist

Portfolio

4DMIND.COM

The website of a Polish company specializing in digital products, where I had the pleasure to work. It is my first website that I built commercially as part of learning CMS Statamic.

HIGHLANDSOLUTIONS.COM

The website of a US company specializing in digital products. One of the nicest websites I have created. I was most satisfied with the parallax effect at the bottom of the page, even though it is not complicated.

The website of a US company specializing in building industrial robots. The website was initially built in React, which had a negative impact on SEO. There were also a lot of animations that slowed down the website. The site was rewritten using CMS Statamic.
